TEAM TESTED DESIGN

FROM THE MOUNTAINS TO THE SEA

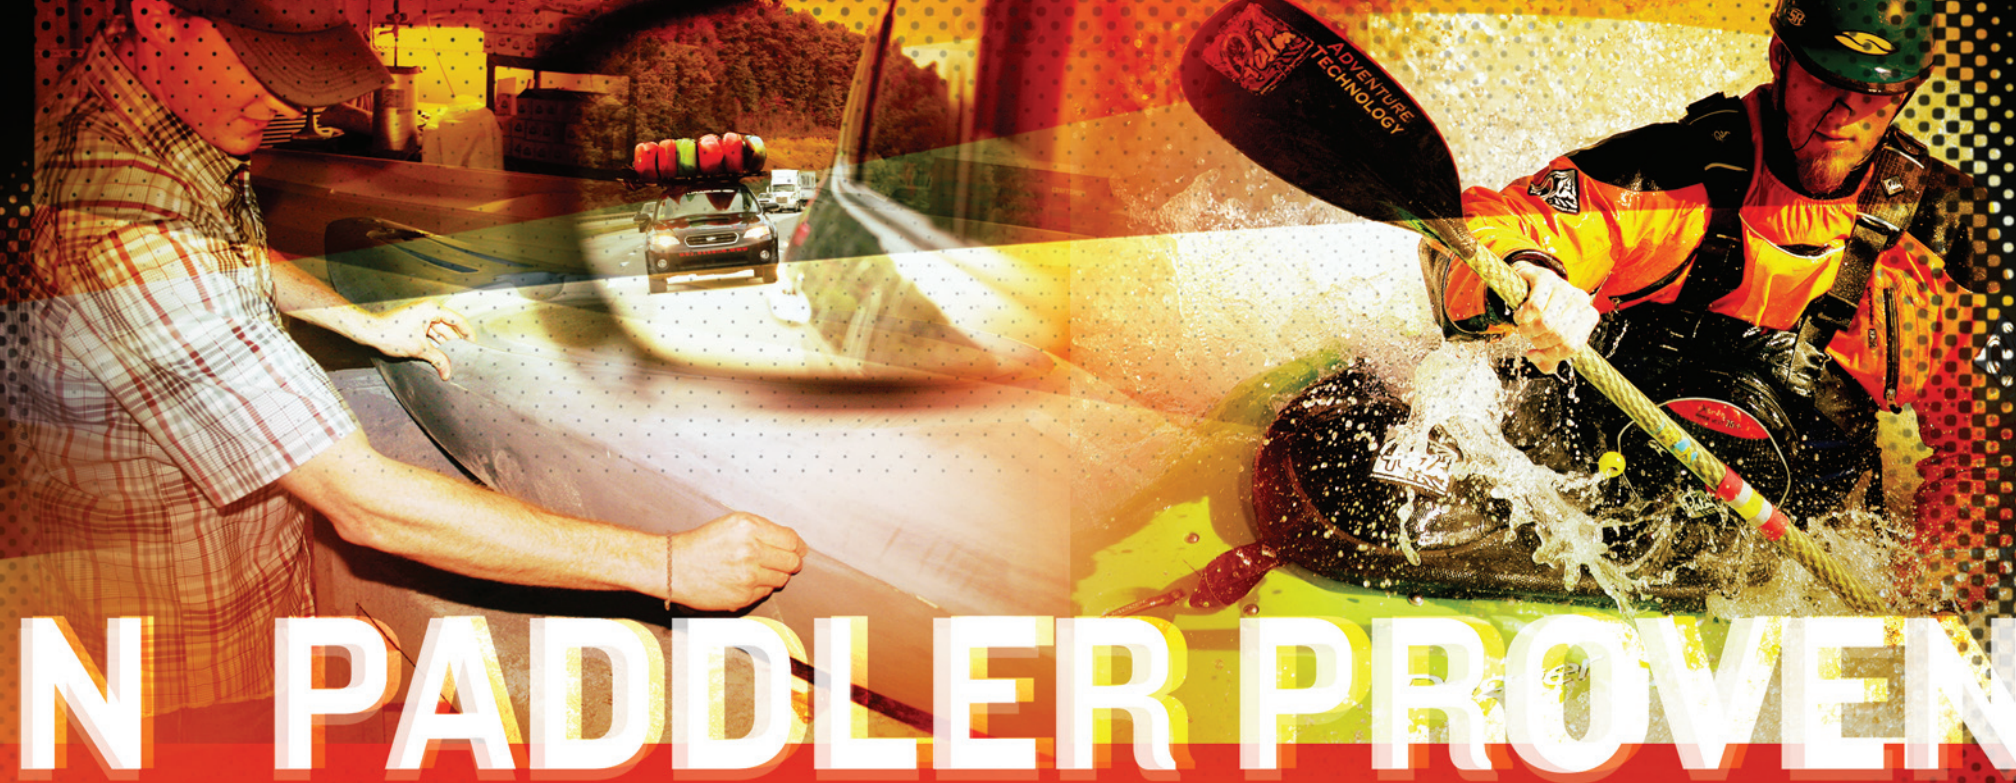

HULL DESIGN INNOVATIONS

Perfecting the Green Boat hull required the optimum rocker curve for maximum speed. This speed is wasted however, if you must fight to steer the kayak and stay upright. By careful reduction of rocker through the stern, it's now more stable and manoeuvrable than the prototype with a greater top speed.

There's a lot that goes into Dagger kayak designs, every one of which must live up to our heritage of innovation, refinement and quality. The truth is that most kayak companies make at least one great kayak. What sets Dagger apart is offering class leading kayaks across the board, mastering every type of water from the mountains to the sea.

A truly great kayak gets people excited to paddle. It requires not only good design, but also an understanding of the journey from drawing board sketch to hull meeting the water. Our integrated R&D process ensures that the final product meets both the standards of the design

team and survives the punishment handed out by Team Dagger.

With a history of record-breaking first descents, a growing tower of trophies and medals, and thousands of days spent on the water; the team don't give their approval lightly. Most importantly, no design gets the Dagger stamp unless it's worth telling stories about for years to come.

WHITEWATER KAYAKS

Whatever your skill level, and whatever the challenge, there's a Dagger whitewater kayak to do just what you want. With an experienced design team and some of the most dedicated and progressive paddlers in the world, it's no wonder that when records are broken and new descents discovered, you'll usually find a Dagger. These are the top performing boats in river running, creeking, freestyle, and pretty much anything else you can do in a kayak.

PURSUIT OF PLAY

NO MATTER WHAT!

Dagger playboats have a world-beating design pedigree, and the competition record to match. These kayaks are dynamic and fun to paddle, yet friendly and forgiving thanks to balanced distribution of volume and a hull that keeps things fast and loose. In a hole, on a wave or on your way to the next feature, these boats will keep you smiling and hungry for more.

THE GREEN BOAT

The Green River in North Carolina is home to the toughest extreme kayaking race in the world requiring fast, precise paddling along with a boat that's up to the job. Since its introduction in 2006, the Dagger Green Boat has dominated the race, having been paddled to first place every year without exception. With the boofing and turning ability of a modern creekboat, this kayak is blisteringly fast and a huge amount of fun. Whether you want to save time and effort on long trips, want to win races, or just simply like going fast, the Green Boat is guaranteed to leave you grinning.

Colours may vary slightly from those shown in catalogue.

Colour combinations will vary from those shown in catalogue and are unique for each boat we produce.

Variations in colour are not covered by warranty.

Polyethylene expands and contracts with changes in temperature and humidity. Actual dimensions can vary from those shown in the Specifications Chart due to molding process and/or exposure to extreme hot or cold temperatures. Slight variations are not covered by warranty. Specifications and features are subject to change.

Spraydeck sizing figures are for Palm Equipment's range of spraydecks. See www.palmequipmenteurope.com to find the perfect model for your kayak.
