PREFACE

DEAR PADDLE SPORT FRIENDS

2010 is going to be an interesting year for many of us. The course has to be reexamined to be able to compete in a world that is getting tougher.

At times, when crisis, staff cuts and the shift to low-cost countries are the main topics of discussion, we consider it important to stick to the basic principles of our company policy which brought us to where we are now. With you, our customers, at the centre of our attention! We are offering you products which are to a major part produced in Germany or Europe. This protects jobs and the continuing existence of our company as well as that of some related suppliers.

We are offering high quality products at fair prices and, of course, quick assistance, if any problem should occur. As past experience showed, this concept can, of course, only work with you as customers. We are very proud of our still growing customer base of paddlers who entrust themselves to our products on the water and spend many happy hours there.

Come aboard! There is something for everyone!
Many happy paddling experiences,

Your Prijon family

Volker Prijon

MADE IN GERMANY

We at Prijon are proud that our HTP boats are still made in Germany. This not only applies to the boat hull, but also to detachable parts.

In our opinion this is the safest way to fulfill our high quality standards or to react quickly, if difficulties should occur. A number of accessories, for example the rudders, car roof accessories or the boat carts are also „made in Germany“. Other articles like paddles or spray decks and pack bags are from EU partner countries. Short distances and continuous contact between us and the respective producers guarantee the best possible supervision of quality. The haulage

distances of goods which are produced in Germany or Europe are markedly shorter, which also drastically reduces energy expenditure for transport. Products which are produced in Germany are marked with the German flag. Products which are „Made in Europe“, are marked with the EU flag. Maintaining and creating jobs is one of our great concerns, we are trying to follow a strategy which benefits our suppliers in Germany and Europe.

- 🇩🇪 Made in Germany
- 🇪🇺 Made in Europe

Oetz - Wellerbrücke

DEVELOPMENT

It is a tradition that we develop our products in close cooperation with our team kayakers and developers. This is the only way to guarantee a well-devised and sophisticated product.

This was no different for our latest idea, the PURE. After the first form had been developed and the first prototypes built from fibre glass and carbon fibre, the team set off to get the

PURE ready for serial production. The result is a modern, thought-through and safe Creeker – in our usual Prijon quality.

Busy testing: Toni Prijon.

BERNHARD MARAUCHER - HELGA UND AMELI LEHNER - JOBST HAHN
LUKAS WIELATT - PATRICE KAISER - MARCO GEUTER - LARS DIPPON

BERNHARD
MAURACHER

HELGA + AMELI
LEHNER

JOBST
HAHN

The kayak dips very well and what is very important, forward and straight up. It is easy to do fast turns and reverses due to the slightly higher edges.

The sleek bow makes the kayak very fast. It only takes a few paddle strokes to bring the boat to maximum speed. It is not fazed by pressing and pushing water. Its position in the water is calm and controlled.

I sat in the boat, adjusted the foot rest and ratchet, everything great. Now just out on the water and test it. Fantastic...

The PURE is fast, has enough edge and is easy to turn. Now I only have to test in white water. So far I am very happy with it. The PRIJON team has done a competent job.

A brief draw stroke, the boat goes and turns where ever I want it to – in any situation! Due to its excellent buoyancy qualities, the PURE always stays on the surface.

It shoots across holes and back flow without losing control. You almost don't submerge any more. There is a standard auto-boof which allows lifting the tip of boat across the back flow at any time.

THE NEW PURE MODERN, RELIABLE AND STABLE

Whitewater

PURE CREEKER

Made in Germany

Many paddlers have waited for this. A boat with modern riding qualities and the best possible interior equipment. And on top of all that almost indestructible!

The PURE, developed by our whitewater team around Toni PRIJON and Bernhard Mauracher is a modern creeker, developed to successfully brace the challenges of steep creeks. Modern

design combined with the reliability and sturdiness of our excellent HTP-material results in a multi-purpose boat.

HERCULES CREEKER  Made in Germany

The HERCULES convinces due to its good-natured and controllable ways. Above all heavy weights and bigger paddlers will appreciate the massive volume and space.

The kayak is very safe in the water and has excellent buoyancy qualities after holes and ledges. The HERCULES is surprisingly agile, runs well in eddies and boofs effortlessly.

The hatch provides an easy emergency exit, also due to non-existing middle wedges. The ideally positioned rim of the cockpit offers perfect room for the back.

Art.No. 101 811

SOČA RIVERRUNNER  Made in Germany

5-year-warranty
Life-long return, free of charge

Whether you are new to the white water sport or if you are a „seasoned expert“ on white waters, the allrounder qualities of the SOČA will convince you quickly.

It is fast, easy to ride on the edges and roll. A lot of volume and the favourable form of the front part of the boat promote very good buoying up qualities. The overall flat profile almost without vertical edges makes it easy for the SOČA to cartwheel.

The flat bottom brings a lot of fun on waves. These qualities, the generally good-natured riding qualities as well as the high-quality seating equipment let you become one with this super allrounder very quickly.

Art.No. 101 911

5-year-warranty
Life-long return, free of charge

Loves his frequent encounters with white water - Thomas Motz and his HERCULES.

CROSS RIVERRUNNER  Made in Germany

The CROSS has well established its place on powerful creeks. Fast, agile and manageable at all times, the CROSS presents itself as a good partner of the paddler in all situations. One can easily ride it on the edge; it bobs up without slipping towards the sides and offers high safety reserves with its volume of 255 liters of light to medium-weight paddlers.

Art.No. 100 131

CHOPPER RIVERRUNNER  Made in Germany

The CHOPPER is the ideal kayak for traditional paddlers and beginners. The rounded hull with the slight keel lines provides a good balance between flexibility and speed. High volume makes it safe, even in powerful waters. Just climb in and paddle away!

WHICH BOAT IS THE RIGHT ONE FOR ME?

The following pages feature a total of 30 of our boat models for sea kayaking and paddle tours. Some in different outfittings. In order to make the selection easier for you, we have divided the boats according to purpose and characteristics.

You will find detailed information on the boats in our information centre from page 50.

To have all important information at a glance, you can leave the back flap with our info centre folded out while browsing through our catalogue.

INFO CENTRE
➔

FAST SINGLE KAYAKS FOR LAKES, COAST AND THE SEA

Long + slim = fast! These boats are relatively slim and long. That's the reason why they possess a high base speed and pronounced track qualities. Long + slim = wobbly! A slim boat keels over more easily than a broader

one. For seasoned paddlers this is no problem. Beginners, however, should test these boats on a calm lake first.

You find fast single kayaks from page 10 ...

ALLROUNDERS FOR ALL OCCASIONS

The ideal compromise! These boats are all a bit broader, providing a better base stability. They also have more or less pronounced keel lines and have therefore very good tracking

qualities. Our allrounders are great for a vast range of terrains, from rivers to lakes to calm coastal waters.

Allrounders from page 16 ...

AGILE RIVER TOURING BOATS

These comparably broad kayaks have a rounder keel and are therefore easier to turn. They are agile and can sometimes even be used in easy whitewater. Tracking

can be influenced using steering equipment. In general these boats are a bit slower on open waters.

River tourers from page 22 ...

BOATS FOR BEGINNERS AND OCCASIONAL PADDLERS

These kayaks are very similar to the allrounders with regard to boat shape. They have good tracking, but can be maneuvered well. The essential difference is the technical equipment of the boats. There are no waterproof storages (except for the Cruiser

III) and the seating is also simpler. Therefore these boats are very well suited for short tours without a lot of luggage or for kayak rental.

Kayaks for beginner/occ. paddlers from page 24 ...

THE MARLINs
FOR LONGER STRETCHES AND MORE

An enormously agile kayak which at the same time has very good tracking. It is easy to ride on the edges and has a very safe position in the water. Athletic sea kayakers who surf the waves, wanting to keep control while

doing so, will be enthusiastic. Safe forward gliding, fast changes of direction using the edges, everything can be done in a safe and precise manner. The very comfortable seating is absolutely suited for longer tours.

MARLIN HTP  Made in Germany

The sturdy variety made of almost indestructible HTP in a blow-moulding process.

Rocky coasts, pebbly beaches and other obstacles won't stop it, the MARLIN will go through thick and thin. Fully equipped with

watertight storage compartments, a Flex-6-seating and various details, this boat is ready for any adventure.

Art.No. 100 470

MARLIN CO  Made in Europe

The classy version, made of Carbon-Aramide or GFK.

With a weight of approx. 20 kg for the Carbon version, the dry handling is very simple. The MARLIN CO is a bit longer and slimmer than the HTP version. This further

increases the base speed, while maintain the agility. The flat cockpit provides a safe seating position and excellent contact with the boat.

GFK
Art.No. 207 02
Carbon - Aramid
Art.No. 207 04

The coast of Corsica is considered a paradise for all sea kayakers. Crystal-clear waters and a rough rocky coast make your heart beat faster.

NEW MARLIN PRILITE  Made in Germany

The latest arrival in the MARLIN family!
Made of modern PriLite .

Needless to say that we also tried to implement the basic concept of the MARLIN series for this one. The form is identical to the laminated version, the cockpit a bit

higher. A optimal travelling boat, which offers light weight while at the same time being very sturdy.

SEAYAK HTP  Made in Germany

For a number of years now, the SEAYAK has been the attraction of our fast single kayaks.

Hardly any other kayak in the segment can be used as universally as the SEAYAK. The long, slim shape provides high speed, the pronounced knickspan on the hull offers a comparably high level of agility, so that you

can also use the SEAYAK on rivers and lakes in an optimal way. Its attractive exterior and the complete equipment round off the picture of this excellent kayak.

Art.No. 100 430

CATALINA HTP  Made in Germany

Sporty, smaller paddlers, women and teenagers are the customers for the CATALINA.

The seating can be best adjusted for these paddlers. Despite the short length for this boating class, the CATALINA is extremely

fast. Seasoned paddlers will appreciate its strengths.

KODIAK, THE BIG ONE
THE IDEAL KAYAK FOR LONG STRETCHES
WITH LUGGAGE ACROSS LARGE WATERWAYS

KODIAK HTP  Made in Germany

The KODIAK is fast, safe and offers unique storage space for this boating class as well as a very spacious seating hatch which makes it especially interesting for larger paddlers.

The high volume is also a further safety aspect when touring at sea. In the past few years the KODIAK has established itself as expedition boat around the globe. Several Greenland expeditions, the circumnavigation

of the North American Continent as well as the whole coast of Norway are only a small selection of tours, during which the KODIAK has confirmed its outstanding position as a safe and fast sea kayak.

Christian Donoso and his team are also using the advantages of the KODIAK on their Trans-Patagonia expedition.

ELEGANT, FAST KAYAKS WITH A LIGHT WEIGHT

PROTEUS LAMINATE

Made in Europe

Currently the PROTEUS is probably the fastest PRIJON Kayak.

It is designed for long, fast tours in open waters and along the coast. Especially prominent keel areas at the front and back provide for an optimal water line. The safe

position in the water and a balanced ratio between tracking and the ability to maneuver makes you feel confident in all areas.

GFK
Art.No. 20 292
Carbon - Aramid
Art.No. 20 294

MILLENIUM LAMINATE

Made in Europe

The MILLENIUM is the elegant and lighter version of our Seayak.

This beautiful kayak is a combination of a fast sea kayak and an agile single kayak for rivers and lakes. On the one hand the long, slim, form provides a high level of speed, the pronounced knickspant on the lower hull, on the other, offers a comparably high mea-

sure of agility, so that you will be able to use the MILLENIUM also on rivers and lakes in an optimum way. An attractive look and the complete equipment round off the picture of this excellent kayak.

T 505 PRILITE

Made in Germany

The PRILITE T 505 is a fast, fully equipped single kayak with knickspant which is ideally suited for open waters.

Two partitions, the PRIJON Deck Box as well as a relaxed seating position are the best basis for fantastic luggage tours on rivers and lakes.

Due to its light weight and the therefore easy handling outside the water, the PRILITE T 505 is ideal for short tours after work.

EXCURSION HTP  Made in Germany

Wide, agile and safe, the EXCURSION is up to all challenges.

The broad knickspan and the rounded ends let the boat glide easily around narrow radiuses, which makes the EXCURSION best suited for tours on rivers and lakes. The high overall volume means a lot of storage space

and a high level of safety. This is another case where our HTP demonstrates its superior position. This boat will accompany you in all sorts of situations!

5-year-warranty
Life-long return, free of charge

Art.No. 100 70

POSEIDON HTP  Made in Germany

With the same length, the POSEIDON's shape is a bit slimmer than the Excursion's.

Pronounced keel lines at the bow and stern lead to better tracking and higher speed. Therefore it is primarily suited for tours in open waters and along the coast which

require a boat that keeps on track and has easy running abilities. Come and test both models and you will soon find your own personal favourite!

NEW YUKON K2 SPORT LAMINATE  Made in Europe

For 2010 we have revamped our classic model.

The upper part of the boat now has new, low weight cockpits. From now on the PRIJON Deck Box is also a standard feature. At the stern, the keel line has been pulled back-

wards, which leads to a longer water line. This makes the Yukon faster and provides better tracking. A great kayak for long tours on open waters.

The bulkhead with shock absorber can be continuously adjusted to leg length and guarantees optimum safety.

The sledge foot-rest can be adjusted to 10 positions. Legs can be stretched out in between. Note: This foot-rest is not suitable for whitewater.

The slide bar can easily be exchanged for an optional small fin.
Fin Art.No. 900 30

LAGUNA
VERY EASY HANDLING – AT ANY TIME

LAGUNA  Made in Europe

Superlight single touring kayak laminated in Carbon-Aramide or GFK.

Based on the YUKON shape, the LAGUNA is predominantly suitable for smaller and medium rivers and lakes.

The keel is not as pronounced as on the longer touring kayaks, which gives the Laguna greater agility. Even a slight use of the edges noticeably reduces the curve radius. So it is a lot of fun moving the LAGUNA around nar-

row curves. The weight for the Carbon boat is approx. 18.5 kg. The handling of this lightweight is very simple, loading on and off the car roof is no longer a problem.

THE CRUISER FAMILY

Great for beginners, occasional paddlers and canoe tourism.
All boats are easy to maneuver and have good tracking.

The very big hatch facilitates getting in and out of boat and conveys a very open feeling when seated. The big sealed-off storage

space at the stern and hard foam core at the front make all CRUISER models unsinkable.

CRUISER 320 Made in Germany

A lot of fun at a short length. Ideal for short trips on small rivers and lakes. The compact measurements make transport and storage easier.

with steering fittings
Art.No. 100 130
without steering fittings
Art.No. 100 120

CRUISER 320 ANGLER Made in Germany

Due to their light weight and the resulting mobility fishing kayaks can be used in more flexible and various ways than rowing boats. Additional features: a tiltable and pivotable rod mounting at the front, which can also be removed and two permanent rod holders which are integrated in the boat hull behind the cockpit. Only available in green and with steering fittings.

with steering fittings
Art.No. 105 135

CRUISER 430 Made in Germany

A well-priced allrounder for all occasions. Very manageable and due to enough speed also making a good impression on longer stretches.

with steering fittings
Art.No. 100 230
without steering fittings
Art.No. 100 210

CRUISER II Made in Germany

Two kayakers on the water in a safe and spacious boat. Glide across the water without any problems with the CRUISER II. You will enjoy it!

with steering fittings
Art.No. 100 229

Art.No. 100 209

NEW CRUISER III Made in Germany

There have always been requests for a family boat which can also accommodate a child or teenager. Other paddlers would like to take their dog along or wish for more storage space for their luggage. For all these customers we are offering the new CRUISER III as a three-seater from March 2010. The middle hatch with 81 cm is big enough for teenagers or small adults.

with steering fittings
Art.No. 100 310

NOTE
The storage at the back of the Cruiser models 320, 430 and II is not watertight. We recommend the use of watertight pack bags. The storage of the Cruiser III in the complete version is sealed water-tight.

5-year-warranty
Life-long return, free of charge

Unsinkable due to the hard foam core at the front Big sealed-off storage at the stern

Cruiser without steering fittings: with sledge footrest

CAPRI I  Made in Germany

The Capri I possesses very good tracking qualities, considering its compact measurements. With a form which is overall a bit slimmer, it is a sporty alternative to the CRUISER boats, especially for smaller and lighter paddlers.

Art.No. 10 930

CAPRI II  Made in Germany

The Capri II is an easy to handle, compact two-seater for beginners and occasional paddlers. Its pleasant and uncomplicated tracking qualities as well as the light weight are above all interesting for smaller and lighter paddlers.

Art.No. 100 960

PIAVE LAMINAT  Made in Europe

The PIAVE strongly resembles the Capri II in form and riding qualities. We are offering this kayak in GFK or Carbon-Aramide. The PIAVE GFK is approximately 25% lighter, the PIAVE CARBON approx. 30% lighter than the Capri II made of HTP. This makes the PIAVE the first choice for paddlers who are looking for a lighter and easy to handle boat, which can still be stored well on a higher car roof.

Whether it is lake, sea, calm river or the toughest whitewater. PRIJON is offering the right paddle for every purpose.

Marco Geuter, TEAM PRIJON
Photo: Peter Lintner

THUNDER

Flat, very stiff blade in profile technology without inner core. The THUNDER allows precise steering and thus optimum of control of the boat.

Length option WW
CARBON, approx. 920g
Art.No. 322 000
GLASS, approx. 1100g
Art.No. 321 000

STREAM

High-quality paddle for touring and sea kayaks. We make very light and elegant paddles from high-quality fibre glass and carbon fibre via a lamination process. They cut easily through the water, save energy and don't flutter.

CARBON, approx. 820g
Art.No. 318 000
GLASS, approx. 950g
Art.No. 317 000

COBRA

The COBRA's design is identical to the Thunder's. Additional indentations in the blade increase the pressure, making each paddle stroke even more effective!

Lenght option WW
CARBON-ARAMID , approx. 920g
Art.No. 337 000
GLASS, approx. 1100g
Art.No. 336 000

C - TOUR PREPREG

A unique touring paddle made of fifteen layers of material using pressure and heat. The blades are light as a feather and very thin, yet at the same time as stable as for whitewater paddling. The asymmetrical blade with stabilizing corrugation guarantees effortless and calm strokes.

approx. 850g
Art.No. 383 000

INFO

Lenght options (in cm)
215, 220, 225, 230, 240

All paddles also available in left hand control.

RIM KINETIC

Sturdy, well-priced beginner paddle. Blade made of impact-resistant RIM material. Aluminum shaft.

Length option WW, approx. 1150g
Art.No. 316 000

RIM KOMBINATION

Allround paddle which can be used for whitewater and touring. Blade made of stroke-resistant RIM material, shaft made of anodised aluminum with soft grip.

Lenght option WW, A, approx. 1130g
Art.No. 311 000
Extra charge for two piece system

No picture:
KOMBINATION GLASS
with glass shaft
Art. Nr. 311 000G

RIM BAMBINO

Paddle for children and teenagers. Reduced blade size with a thinner shaft for a better hold for small hands.

Lenght option C, approx. 1080g
Art.No. 313 000

SUNSHINE

Well-priced paddle for free time paddlers and children. Plastic blade made of ABS with vertical ribs. Aluminum shaft.

Lenght option A,C, approx. 1150g
Art.No. 331 000

BORA

The „BORA“paddle with its beautiful shape is a cheaper variety of the new profile touring paddles. We are using a dry impact resistance polyamide 6 with UV stabilizers, enriched with approx. 35% glass fibre. In doing so, we achieve a high level of stiffness, while at the same time keeping the impact resistance very high.

approx. 970g
Art.No. 355 000

PASSAT

With a blade area reduced by approximately 25% and a smaller shaft diameter, compared to the BORA paddle, this paddle is especially suited for teenagers and small adults. The low weight and the small effort needed, make it possible to paddle also longer stretches without tiring quickly. Smart take-apart system not available for the Passat.

approx. 870g
Art.No. 356 000

SMART SHAFT

Almost all touring paddles are available with Smart Shaft for an extra charge. For continuous adjustment of paddle rotation and length.

Lengths: 210cm, 220cm und 230cm, each paddle can each be continuously adjusted by additional 10cm.

Extra charge for Smart Shaft.

ARDECHE SERIES

The paddles of the ARDECHE series have been especially designed for classic touring purposes. The asymmetrical blade shape ensures energy-

efficient and effective strokes. The centre rib stabilizes the blade, making strokes smooth and flutter-free.

CARBON ARDECHE

Superlight touring paddle made of Carbon-Aramide material. Blade with aluminum edge. Laminated by hand.

approx. 930g
Art.No. 324 000
Extra charge for Smart Shaft.

BLITZ ARDECHE

Elegant and light touring paddle. Blade laminated by hand from glass - Epoxi with reinforced edge. Glass shaft with grip profile.

approx. 1160g
Art.No. 364 000
Extra charge for Smart Shaft.

RIM ARDECHE

Well-priced beginner paddle. Blade made of impact-resistant RIM material. Aluminum shaft.

Aluminium shaft, approx. 1290g
Art.No. 314 000
Glass shaft, approx. 1190g
Art.No. 314 000 G

INDIAN RIM

Tough canoeing and rafting paddle. Blade made of Impact-tough RIM material. Aluminum shaft.

approx. 890g
Art.No. 352 000

ONTARIO

Classic straight-shafted wooden paddle with a tapered shaft and diagonally glued blade. Aluminum edge.

approx. 1050g
Art.No. 354 000

ALZ

Take-apart wooden paddle with veneered blade and aluminum edge.

approx. 1250g
Lenghts: 210cm, 230cm, 240cm
Art.No. 341 000

PACIFIC SERIES

Due to their slim shape, the PACIFIC paddles facilitate even strokes while at the same time not being very susceptible to wind impact.

The reduced blade size saves energy on longer stretches.

SMART SHAFT

Aufpreis Smart-Shaft, € 24,-

CARBON PACIFIC

For those paddlers who love something special. Superlight blade made of Carbon-Aramide material. Carbon shaft. Hand-laminated.

approx. 930g
Art.No. 325 000
Extra charge for Smart Shaft.

BLITZ PACIFIC

Hand-laminated glass-epoxi blade with reinforced edge. Glass shaft with oval grip profile.

approx. 1150g
Art.No. 365 000
Extra charge for Smart Shaft.

RIM PACIFIC

Well-priced beginner paddle. Blade made of impact-resistant RIM material. Aluminum shaft.

Aluminium shaft, approx. 1100g
Art.No. 315 000
Glass shaft, approx. 1050g
Art.No. 315 000 G

INFO

Our canoeing paddles are available in lengths 140cm to 160cm. In steps of 5cm. 165cm also available uncut.

PADDLE FLOAT

The paddle float converts the paddle into a stabilized boom, making it easier to re-enter the kayak. An essential companion when venturing into open waters.

Art.No. 80 330

DRIP RINGS

Split ring construction, fits any paddle. Set.

Art.No. 90 182

PADDLE LEASH

Very sturdy paddle leash. 25 mm tubular strap with integrated rubber cord. Attached to paddle with a belt loop with Velcro closure.

Art.No. 90 180

SURF

Light ABS-plastic shell with high level of rigidity. Shock-absorbent Polypropylene hardfoam interior with soft contact pads, distributing the shock energy from outside and thereby reducing it. The helmets are continuously adjustable by the Spin-Disk-System from 51 -63 cm head girth. Available in the colors yellow, red and black.

FULLCUT
Art.No. 50 110
SHORTCUT
Art.No. 50 160

PRIJON helmets are tested in accordance with CE EN 1385

PROTECTOR

More stable than any other kayaking helmet in the market! The shell constructed of thermoplastic, reinforced Carbon-Aramide material reliably protects the head against the hardest of blows. Sophisticated design. Shock-absorbent Polypropylene hardfoam interior with soft contact pads, distributing the shock energy from outside and thereby reducing it. The helmets are continuously adjustable by the Spin-Disk-System from 51 -63 cm head girth.

Art.No. 50 130

TEPEX.®
Advanced Thermoplastic Composite Systems

MACH I

The MACH I is characterized by its great freedom of movement as well as a perfect fit. Due to various adjustment possibilities, the vest can be excellently adjusted to the body. An enclosing strap-system circles the upper body and provides very high tear strength in case of emergency rescue. Broad shoulder straps, rescue belt with panic release. Net pocket inside, big zipper bag at the front. Carabiner port with Neoprene pocket for rescue rope. Upper material Cordura, AIREX buoyancy foam.

Sizes: S - XXL
Art.No. 80 050

OFFSHORE

The Offshore is offering more buoyancy than is offered by most buoyancy aids in this segment. This drastically increases safety at sea. The wide neck/ collar area goes excellently with the new collar system of the WAVE sea kayak jacket. Novelty in vest design: Due to the different adjustment possibilities the best possible fit can be achieved, the foam is added onto the vest from outside, the ability to move about and the comfortable fit is therefore increased. Uncomfortable pressure in the chest area is a thing of the past with this vest.

Sizes: S - XXL
Art.No. 80 060

INFO
 Reflective stripes further increase safety!

ALLROUND THROWBAG

With a 20 meter line, belt loops at the sides and perimeter strap with a lock for fast attaching to the equipment when climbing or to secure it in the kayak.

Art.No. 80 325

THROWBAG TEAM

Kernmantle rope 1200kg. Rope length 20 metres. Extra large opening with Tenax – safety fastener. Reflective stripe. Kayak carabiner in Neoprene pocket. Loops for attachment to waist belt.

THROWBAG
Art.No. 80 322
Waist belt with fast release
Art.No. 80 310

TOWLINE

Useful piece of rescue equipment for tourers and sea kayakers. The cord can be adjusted lengthwise. There is a floater and a carabiner at the end of the cord, as well as a rubber cord to soften the impact. Waist belt and pocket fastener, with quick release system for quickly removing from body in case of danger.

Art.No. 80 179

KAYAKING KNIFE

Single hand knife with rust-proof 7cm blade. Rounded tip to prevent injuries. Grip aluminum with rubber effect, with loop for safety line and rust-proof clip for attachment.

Art.No. 80 510

RESCUE KNIFE ARA XL

The ARA-XL by Antonini. The blade is made of best 440-A-steel and has a rounded tip to prevent injuries. Devices for cutting ropes and belts, a large loop for the safety carabiner as well as a catch for the blade to prevent unwanted opening.

Art.No. 80 511

ANGLER LIFE VEST

Inconspicuous simple life vest for fishing or paddling. Made of sturdy Nylon material with foam cushions which can be taken out. 3 large pockets. Zip at the front. 4 straps at the sides to adjust size. Shoulder strap for length adjustment.

Sizes: M - XXL
Art.No. 80 030

ROPE ROLL PULLEY
 For building a hoist.
Art.No. 80 180

RESCUE SYSTEM COWTAIL LONGLIFE
 A great all-around piece of rescue equipment for whitewater. Paddling carabiner included.
Art.No. 80 190

NOSE CLIP
 With stainless steel spring clip, rubber pads and cord.
Art.No. 90 185

PADDLE CARABINER
 Fits around the paddle shaft.
Art.No. 80 410

KAYAK CARABINER
Art.No. 80 405

WAVE PADDLING JACKET

For excellent ventilation in nice conditions, just open both fasteners of the new collar. In rough weathers, just close the outer Neoprene collar and you are very well protected! This jacket comes with a double Neoprene cuff at the wrists. This highly breathable and waterproof three-layered material guarantees a comfortable fit. You feel warm and dry.

Sizes: S - XXL
Art.No. 44 420

WAVE HOODIE

The hood can be used independently of the jacket, it always fits your head, as there are different possibilities to adjust the hood to the shape of head. Closed at the neck: The hood offers protection from rain and seals off towards the jacket. The facial protection is folded back and attached with a Velcro fastener. Closed facial protection: The face is best protected from the elements.

Art.No. 46 980

WAVE PADDLING PANT

Simply cut paddling pant with Neoprene hem in the hip area; warming Neoprene cuffs at the legs and an adjustable fabric hem. At the seat and knees, the material has been reinforced by Cordura applications. The combination of jacket and pants provides warm and dry paddling fun, even in stormy and rainy weather.

Sizes: S - XXL
Art.No. 44 430

WAVE material characteristics:
Breathability rating: 13.000g/m2/24h
Water column: 20.000 mm

Upper material: 100 % Nylon
Membrane: 100 % Polyurethane
Lining: 100 % Nylon

DRY EXTREME JACKET

The microporous PU membrane on the outside results in a rolling- off effect of the water and is dirt-resistant. Distinctive hip fastener with flexible adjustment possibilities on the outer tunnel. Padded areas at the shoulders and elbows offer protection and facilitate carrying the kayak on the shoulder. Latex cuffs at the arms and neck will keep you absolutely dry.

Sizes: S - XXL
Art.No. 44 400

SEMI EXTREME JACKET

Like DRY EXTREME, but with double Neoprene cuffs at the neck and arms. For increased comfort on longer tours and for paddlers with a latex allergy.

Sizes: S - XXL
Art.No. 44 440

DRY EXTREME PANTS

The high cut with shoulder straps keeps you dry even in creeks that go up to your hip. The waterproof zip at the front saves a lot of time when nature calls! Additionally reinforced material and padding at the knees increases durability and the comfortable fit. The seat has been especially reinforced with Cordura inserts. The legs end in latex with protective and warming neoprene cuffs.

Sizes: S - XXL
Art.No. 44 410

INFO
MATERIAL DRY EXTREME
Extremely breathable
due to its four layers
20000 mm water column
Breathability rating 9000 g/m²/24h

Upper material: 100 % Nylon
Membrane: 100 % Polyurethane
Lining: 100 % Nylon

BAMBOO SHIRT

Made of odor-neutralizing breathable material which quickly diverts moisture from the skin. When the body temperature increases and thus the production of sweat, the Bamboo material absorbs moisture. Via the membrane of a breathable paddling jacket sweat is immediately transported outwards. The incorporated UV-ray protection of 50+ protects the skin from sun. Natural infrared rays in the bamboo promote the body's own insulation.

64% Recycled Polyester
25% Viskose (Nano Bamboo Charcoal)
11% Elasthane

Male sizes S –XXL
Art.No. 49 160
Female sizes S- XXL
Art.No. 49 170

MULTISPORT BRILLE

Functional glasses

Glasses made of unbreakable, polarizing polycarbonate glass which means excellent protection from strong reflection, for example from the surface of the water.

Glass finish with nano effect

The surface finish makes water peel off instantly and thus provides invisible moisture protection.

Safety due to padded interior foam clip

The interior clip cushions blows and thus protects from facial injuries. Glasses can also be worn comfortably without padding.

Removable head band.

Art.No. 90 350

RAIN COMBI

Combined paddling jacket and spray deck. Suitable for almost all hatch sized by adjustment of the rubber strap.

Material:

Nylon-Ripstop, two-layered breathable.
Upper material: 100 % Nylon
Membrane: 100 % Polyurethane

Sizes: S/M + L/XL
Art.No. 44 300

WARM UP NEOPRENE

The WARM-UP Neoprene series convinces due to high-quality material, perfect fit and pleasant design.

PANT MULTI FLEX

Neoprene pant with attractive design. Stretchy section for perfect fit. Laminated on both sides, grip print on seat and knees.

Sizes: XS - XXL
Art.No. 41 800

SHORTY WARM UP

Neoprene shorts, laminated on both sides, cut to a snug fit, with stretchy sections for perfect fit. The anti-slip coating at the hem keeps the shorts in place.

FEMALE SIZES: 38 - 44
MALES SIZES: 46 - 58
Art.No. 41 700

LONG JOHN WARM UP

Neoprene suit, laminated on both sides, very elastic 4mm thick material. Stretchy sections were included to provide good and very comfortable fit. Abrasion-resistant lamination at the knees and seat prevents premature abrasion. Ladies model with additional crotch zip.

FEMALE SIZES: 36 - 44
Art.No. 41 600
MALES SIZES: 46 - 58; 26 - 28, 98, 102, 106
Art.No. 41 600

JUNIOR LONG JOHN

Neoprene suit laminated on both sides. The variable Velcro fastener at the shoulders and the flexible material make the suit grow with your child.

Art.No. 43 200

KID BUOYANCY AID

Front zipper, chest and tummy belt for perfect fit, crotch strap to prevent slipping out, unconsciousness-safe collar, signal whistle, large reflectors.

Size 1: 15 - 20 kg
Size 2: 20 - 30 kg
Size 3: 25 - 40 kg

Art.No. 80 040

JUNIOR JACKET

Breathable jacket with comfortable fit. Adjustable collar and cuffs. Velcro fastener. Two-layered material.

Two-layered material:
Upper material: 100 % Nylon
Membrane: 100 % Polyurethane

Sizes 1, 2 and 3
Art.No. 46 760

JUNIOR NEOPRENESHIRT

Long-sleeved shirt made of thin Neoprene. Very stretchy and pleasant to wear.

Sizes 1, 2 and 3
Art.No. 41 360

JUNIOR NEOPRENESHORT

Short Neoprene pants cut to fit when sitting. 3-mm-Neoprene, laminated on both sides.

Sizes 1, 2 and 3
Art.No. 43 210

SIZES	1	2	3
height	132 - 142	142 - 152	152 - 162
chest	66 - 71	71 - 76	76 - 81
waist	53 - 58	58 - 63	63 - 68
hip	71 - 76	76 - 81	81 - 86

SUPERLIGHT NEOPRENE

Superlight – Neoprene is suitable for competitive sport, summer paddling and for wearing under non-breathable paddling jackets. Upper lamination 100% „Superstretch“Nylon. The thermo-reflective lamination is pleasant on the skin, offers perfect ability to move and protects the body from cooling down.

T-SHIRT SUPERLIGHT

Short-sleeved top.

Sizes: S - XXL
Art.No. 41 350

SHORTY SUPERLIGHT

Short Neoprene pant cut to fit when sitting.

Sizes: S - XXL
Art.No. 41 450

CAP SUPERLIGHT

Very thin cap. Keeps warm and does not get in the way.

Art.No. 40 700

PULLOVER SUPERLIGHT

Like Neoprene t-shirt, but with long sleeves.

Sizes: S - XXL
Art.No. 41 550

POP STOP NO NAME

Bernhard Mauracher's favourite deck! Extreme deck for rough rides. Abrasion-resistant lamination of the cockpit rim area, with especially tight elastic band. The latex lamination on the inside provides extremely good grip on the cockpit rim. Grip sling at the front and panic belt across are standard features.

Waist sizes: 72 cm, 79 cm, 86 cm, 93 cm
Art.No. 72 400

ROCK NO NAME

Allround whitewater spraydeck with knee belt and grip sling. Latex lamination for good grip on the cockpit rim. Outside lamination at the front to protect the Neoprene.

Waist sizes: 72 cm, 79 cm, 86 cm, 93 cm
Art.No. 72 500, € 89,-

SUPRATEx PRO

Neoprene spraydeck, coated on both sides, for whitewater kayaks. Outside coat abrasion-resistant SUPRATEx with protective print at the front. With grip sling at the front and knee belt across. Available waist sizes from 64 cm up to 92 cm, in steps of 7cms. Suitable for all standard whitewater hatches.

Art.No. 72 200

SUPRATEx PRO II

Same spraydeck as SUPRATEx PRO, but with double chimney cuff for tighter fit with a paddling jacket with double chimney. Suitable for all standard whitewater hatches.

Art.No. 72 300

NYLON SPRAYDECK

Light Nylon deck with shoulder strap and elastic band at the hem. Ideal for kayaking clubs and schools. Fits the current whitewater hatch 86 x 49 cm by PRIJON.

Art.No. 74 320

TOURING NO NAME

Touring and sea kayak spraydeck made of Neoprene. Adjustable hem made of Polyurethane with soft fleece lining on the inside. The Latex lamination provides perfect hold on the rim of the cockpit, even in rough sea and when doing an Eskimo roll.

Art.No. 73 500

TOURING SUPRA

Neoprene spraydeck with Nylon chimney. Plate made of soft Neoprene with Supratex – coat and grip print on the inside. Width of Nylon chimney can be adjusted.

Hatch size up to 85 cm: Art.No. 73 300
Hatch size up to 93 cm: Art.No. 73 400

NYLON BLACK-YELLOW

Sturdy plate, soft chimney with pocket, implosion bar, removable shoulder straps, welded seams.

Sizes and Art.No. see table

NYLON WITH PACK BAG

The handy dry pack bag is integrated into the spraydeck firmly attached to it. Small items are within easy reach of the paddler.

Available in sizes 2, 3, 4 and 7

NYLON RED

Soft, light Nylon material, pocket at the front of the chimney, welded seams, removable shoulder straps.

Sizes and Art. No. see table
from € 63,-

NYLON UNIVERSAL

Nylon spraydeck with mesh pocket at the front, grip sling and shoulder straps. Cockpit size and hem adjustable with elastic band.

Hatch size up to 85cm: Art.No. 72 600
Hatch size up to 93 cm: Art.No. 72 700

FLOATERS

prevent a kayak from filling with water after emergency exits and provide extra stiffness for the boat.

Floater PVC blue

Simple, functional floater for occasional to medium use.

Floater Nylon red

Sturdy and resistant, suitable for whitewater kayaks.

We are offering single floaters as in table on right.

Size 3	PriLite 470, PriLite 505, PriLite Marlin, Seayak, Motion, Marlin HTP, Marlin CO, C 359, Millenium, Proteus, Piave, Laguna, Alborea, Yukon K II from 2010			
Size 4	Poseidon, Yukon Expedition, Yukon K II up to 2009			

COCKPIT COVER NEOPRENE

Tight grip, won't flap.

Cockpit up to 85 cm: Art.No. 78 210
Cockpit up to 93 cm: Art.No. 78 200

COCKPIT COVER NYLON

Sizes and Art. No. see table

HATCH BAG

A combination of watertight clothes bag and hatch lid. Roll-top closure with triple safety buckles. Universal size for cockpits from 86cm. Straps, which are fastened around the boat, for strong hold. Handles facilitate handling of the boat with attached bag. Shoulder strap detachable. Material Nylon, taped seams.

Art.No. 78 010

BARRELS

Screw-top closures and rubber seal ensure these storage barrels are watertight, sturdy and food safe. The smallest barrel will fit behind your back belt.

AIR PACK

With the AirPack the paddler can always carry dry clothes without having to do without the safety of a floater. Water-tight pack bag combined with separate floater. Material: sturdy Nylon
Size as floater 5.
See table page 42.

Art.No. 60 409

MAP SLEEVE

Watertight, see-through, with four plastic carabiners.

DIN A4 Art.No. 44 021
DIN A3 Art.No. 44 026

PACK BAGS

Flat pack bags with roll-click closure. Wise addition to your boating gear. The flat cut enables storing the bag in narrow spaces. Due to this shape, the bag is also suited as a simple deck bag under the deck net of touring kayaks.

**FOAM PADDING**

Prevents the kayak from slipping.
2 pieces.

Art.No. 90 236

J - BARS

Made of galvanized steel with plastic sleeve.
Set of 2.

Art.No. 90 210

V - BARS

For transport of canoes or two-seater kayaks. Set of 4.

Art.No. 90 221

LOAD ASSIST

Loading your boat made easy with PRIJON's load assist! Fits every roof rack – easy handling even for smaller persons.

Who does not have this problem? The boat is heavy and the cars are getting higher and higher. Many paddlers are being put off the sport due to the sometimes very energy-consuming handling. The PRIJON load assist makes it possible for one person to load a kayak without any extra help. The load strap prevents the kayak from slipping backwards. The bow is placed on the extension, the stern lifted on the rack. Push the extension in, strap down the boat, done!

The most important advantages: You never have to carry the whole weight of the boat. There is no more difficult balancing to do. Even smaller persons can now easily load the boat onto the car roof.

Art.No. 90 225

**J - BAR WITH PADDLE HOLDER**

You can now safely stow 2 paddles with each boat. The paddle holders are firmly connected with the J-bars. Paddles do not require extra strap. Set of 2.

Art.No. 90 215

**VERTICAL SUPPORT - BAR WITH DOUBLE EYELET**

Ideal solution, if you want to transport several boats on your car roof. Belts can be strapped down on both sides. Set of 2.

Art.No. 90 219

NEW**ADAPTER LARGE**

Adapter for attaching our roof rack equipment on oval or square profile tubes without groove. Maximum width 90mm and maximum height 45mm. Set of 2.

Art.No. 90 228

ADAPTER SMALL

Adapter for attaching our roof rack equipment on oval profile tubes with groove. Set of 2.

Art.No. 90 226

**PYTHON MASTERLOCK**

Made in USA. Very sturdy anti-theft device for kayaks, bikes and other sporting equipment. The steel cable can be tightened after locking. Three different lengths of steel cable are available for the system:

Lock Art.No. 90 178

Steel cable 2.4 metres: Art.No. 90 177

Steel cable 4.5 metres: Art.No. 90 179

Steel cable 9.1 metres: Art.No. 90 176

**TIE-DOWN STRAPS**

Made of Polypropylene with self-clamping metal buckle.

3,5 m

Art.No. 90 240

5,0 m

Art.No. 90 250

**BOAT CART WITH SUPPORT**

Free-standing cart with bulky tires, good ground clearance, cargo straps included. Material: Stainless steel, weight 2.6 kg, Capacity: approx. 110 kg.

Art.No. 90 193-
Stainless steel frame. The boat cart has no centre axle and therefore easily fits in your storage hatch.

**SMART TRAVEL**

Very small aluminum boat cart for sea kayaks. Width of bars and wheels can be adjusted, can be dismantled completely, fits into narrow storage space. Material: aluminum, weight 2.3 kg, capacity approx. 120 kg.

Art.No. 90 188

**CROSSOVER**

Due to its round cushions suitable for all boat hulls from sea kayak to canoes. Can be fully dismantled, with broad wheels. Fits into narrow storage space. Cargo straps included. Material: Aluminum, weight 3 kg, capacity approx. 120 kg.

Art.No. 90 186

**SUPERSLIM**

The wheels no longer have to be taken off for dismantling. Wheels, axles and supportive elements form a flat unit which only has to be connected to the cross axle. This results in very flat packing dimensions. Assembling and dismantling is done via two clamp screws. The wheels are foamed, so there is no tiresome pumping or loss of air. Weight 1800 grams, material aluminum. Capacity approx. 75kg.

Art.No. 90 189

**CROSSOVER LIGHT **NEW****

Very light innovative wheels reduce the weight of the CROSSOVER to just below 2 kg. The contact area of the wheels is very wide, which prevents sinking into soft ground. The wheels are foamed, there is no more pumping, flat tires are a thing of the past. Material: Aluminum, weight 2 kg, capacity approx. 120 kg.

Art.No. 90 190

**NEO SHOE HIGH**

High-cut Paddle boot, super-elastic Neoprene, vulcanised sole.

Sizes 37/38 – 45/46
Art.No. 42 300

**NEO SHOE FLAT**

Low-cut paddle bootie. Super-elastic Neoprene, vulcanised sole.

Sizes 37/38 – 45/46
Art.No. 42 400

**NEOPRENE SOCKS**

Neoprene lined on both sides. Keep your feet warm in the water!

Sizes 36/37 – 46/47
Art.No. 40 600

**PADDED SEAT AND BACKREST**

The included lumbar support can be adjusted via the backrest. Seat made of sturdy Nylon material with included foam padding, back rest cushioned with preformed foam wedge. Suitable for many different types of seat.

Art.No. 90 161

**COMFORT BACKREST**

For PRIJON touring kayaks. The backrest is approx. 10 cm higher than standard backrests and very easy to install.

Art.No. 90 134

**SEAT COVER SIREX**

Keeps you warm inside your kayak and at the camp fire.

Art.No. 90 160

NEOPRENE GLUE

For repairs on spraydecks and Neoprene suits.

125g, Art.No. 00 040

**MARINE GOOP**

For gluing of foam separations and other sealing jobs on HTP kayaks.

110ml, Art.No. 00 017

XERAPOL POLISHING PASTE

For surface care and removal of minor scratches on PriLite kayaks.

50g, Art.No. 90 092

**SEAT AND BACKREST CUSHION**

To upgrade your Prijon touring seat.

Seat cushion: Art.No. 900 013 15
Back rest cushion: Art.No. 900 013 05

**CAMP FIRE MULTI-PURPOSE SEAT**

Padded Kayak and camp fire seat, made of Nylon with adjustable back rest. Upper material 100 % Nylon

Art.No. 90 163

**CANOE SEAT KOMFORT**

Padded canoe seat for additional installation, incl. straps for attachment. Upper material 100 % Nylon

Art.No. 90 162

**PADDLING PAWS**

Keep your hands warm in extreme temperatures. One size for all, made of 4 mm - Neoprene.

Art.No. 40 840

**PADDLING PAWS SUPERLIGHT**

Light pawls, made of 0.5 mm thin Neoprene with thermo-reflecting inside lining.

Art.No. 40 850

**GLOVES**

Made of Neoprene. Non-slip texture on the inside and fingers. Pre-bent fingers, Velcro strap at the wrist.

Sizes S – XXL
Art.No. 40 830

**SEAT CUSHION**

For better pressure distribution on the seat area on longer tours. Made of orthopaedic foam.

Art.No. 90 159

**ABRASION PROTECTOR**

For the stern of Cruiser 430 in case of frequent ground contact, for example in kayak hire.

Art.No. 90 031

HAND BILDE PUMP

Inside shaft made of stainless steel. Inserted through the spraydeck tunnel into the boat interior.

Art.No. 90 123

**SEAT FIT KIT**

Different pieces of foam to adjust the sitting position.

Art.No. 90 015

**REPAIR KIT POLYESTER**

Repair material for GFK kayaks.

400g, Art.No. 00 012

**REPAIR KIT EPOXY**

For repairs of minor damages on Carbon-Aramid kayaks and boats made of PriLite.

250g, Art.No. 00 011

**REPAIR STICKS HTP**

For repairs of minor damages on HTP hulls. Available in different colours.

Art.No. 90 080

WHICH MATERIAL IS THE BEST?

We are offering three different materials for sea kayaks and touring kayaks. You will find the best kayak material for your purpose. HTP is the sturdiest material used in the production of kayaks world-wide. Whatever you are planning, the boat is up to it. Laminate kayaks, made of Carbon-Aramide are very light and elegant. If low weight

is important to you, they are the right choice. Laminate boats are, however, more susceptible to ground impact and should therefore be primarily used in free-flowing waters. PriLite kayaks are in between HTP and Laminate with regard to weight and sturdiness. They are lighter than HTP, but sturdier than Laminate kayaks.

HTP

HIGH-PERFORMANCE THERMOPLAST

For the production of its world-famous HTP-kayaks, PRIJON is using a special PE, called HTP. This material can only be used in blow-moulding and not in roto-moulding, as used by other producers of kayaks. The molecule chains of HTP are approximately 10 times longer than those of rotated PE. This makes the boat hulls stiffer, lighter and less susceptible to abrasion. HTP-kayaks have clear advantages regarding form stability, abrasion

and boat weight, compared to kayaks made of rotated PE. HTP is very environmentally friendly. When it is recycled, there are no poisonous gases or residues; it is ground water neutral and free of heavy metals. Care: HTP-boat shells are very sturdy and already possess a permanent protection against UV-rays. Therefore they need no treatment with varnishes, wax or other care materials.

- + Extremely high level of mechanical resilience
- + Not sensitive to ground contact
- + Stiff and form stable when paddling in arctic or tropical regions
- Comparably high weight

material	mechanical resilience	thermal resilience	not sensitive to ground impact	weight handling
HTP	✓✓✓✓✓	✓✓✓	✓✓✓✓✓	✓✓✓
GFK	✓✓	✓✓✓✓	✓✓	✓✓✓✓
Carbon-Aramid	✓✓	✓✓✓✓	✓✓	✓✓✓✓✓
PriLite	✓✓✓✓	✓✓✓✓	✓✓✓	✓✓✓✓

PRILITE

For PriLite boats, the ABS-combination plates, sealed with UV-resistant perspex, are pulled into the hot moulds, which have a temperature of approximately 80 degrees, in a computerized process, using heat and vacuum. The upper and lower parts of the boat are inseparably joined together by a double-sided U-profile. This profile additionally strengthens the sides of the kayak against impact. The mounting of deck mountings and interior fittings are thoroughly done by hand, as on all Prijon boats.

- + Lighter than HTP
- + More sturdy than GFK/Carbon Aramide
- More susceptible to mechanical wear and tear than HTP

Advantages: PriLite boats are approx. 20% lighter than comparable kayaks made of HTP. At the same time there is a clear advantage regarding stability compared to GFK or Carbon/Aramide.

Repairs/Care: Superficial scratches can be polished off with a special paste, available in specialized shops. Larger repairs are made with Epoxi. The inside of the boat should not be permanently exposed to sun (store upside down!).

LAMINATED KAYAKS

Laminated kayaks are made by hand in the traditional way. They are more sensitive to contact with the ground compared to boats made of HTP or

PriLite, and should therefore be predominantly used in free-flowing waters. PRIJON is offering the two material varieties of GFK and Carbon/Aramide.

Carbon-Aramide

These boats mainly consist of carbon and Aramide fibres, combining the excellent qualities of carbon, which is very hard and gives the boat its stiffness with the qualities of Aramide, which is very shock-proof and provides the necessary impact resistance of the kayak. The biggest advantage of this construction method is clearly the incredibly low weight (up to 10kg lighter than HTP-boats).

GFK

The fibre mats of our GFK-kayaks mainly consist of glass fibres, which are very stiff, but still reasonably priced. Kayaks made of GFK are comparable to the PriLite boats with regard to their weight.

- + The lightest boat, 25% less weight than a HTP-kayak
- + Elegant shape
- More susceptible to mechanical wear and tear than HTP and PriLite
- + 20% reduction of weight compared to a comparable HTP-kayak
- + Elegant shape
- + Simple handling outside the water
- More susceptible to mechanical wear and tear than HTP and PriLite

HTP – ONLY THE BEST FOR YOU

For the production of its world-famous HTP-kayaks, PRIJON is using a special PE, called HTP. This material can only be used in blow-moulding and not in roto-moulding, as used by other producers of kayaks.

The molecule chains of HTP are approximately 10 times longer than those of rotated PE. This makes the boat hulls stiffer, lighter and less susceptible to abrasion. HTP-kayaks have clear advantages regarding form stability, abrasion and boat weight, compared to kayaks made of rotated PE. HTP is very environmentally friendly. When it is recycled, there are no poisonous gases or residues; it

is ground water neutral and free of heavy metals. Therefore we can give you a life-long guarantee to take back all HTP boat hulls at no cost for you.

Care: HTP-boat shells are very sturdy and already possess a permanent protection against UV-rays. Therefore they need no treatment with varnishes, wax or other care materials.

Lukas Wielatt of TEAM PRIJON is taking aim on the Rein da Medel/Medelser Rhein.

EQUIPMENT WHITEWATER KAYAKS

FLEX 6 Adjustable Seating System

The 6 different options of adjusting the seat offers extremely secure hold in the boat and make it possible to adjust the seating position in

the best possible way. The seat is soft and warm due to fully foam-cushioned seat, backrest and thigh rests.

BULKHEAD DEFLECTOR PLATE

The foam-cushioned bulkhead deflector plate can be adjusted according to leg length and guarantees best safety. The foam shield at the front protects the buoyancy material. Technical design varies according to boat model. The safety belt at the shock absorber cushions hard blows.

THIGH RESTS

The thigh rests are adjustable in two positions by 7cms each. The new cushioned contact areas offer good hold and a high level of comfort.

SEAT

The seat can be continuously adjusted lengthwise. Loosen the screws at the sides, move the seat and then tighten the screws again.

4

5

6

4

5

NEW
3D GRIP thigh rests with
almost countless adjustment
possibilities.

Only available for the PURE.

FOAM WEDGE

The foam wedge in the seat middle fastens the seating position in the seat shell. It can be adjusted lengthwise.

HIP CUSHIONS

Hip cushions of foam seat adjustable by distance wedges. Seat becomes wider or more narrow.

BACK STRAP

A ratchet strapping system with rough adjustment and fast release gives the back strap tight hold and will not yield to the body pressure.
